

WILLOW LAKE DAY CAMP - SUMMER 2010  
CAMPER RELEASE

PLEASE ATTACH A  
PICTURE (standard school  
picture is preferred) OF YOUR  
CHILD. WE ARE REQUIRED  
TO HAVE THIS ON FILE.

PLEASE PRINT

Name of child \_\_\_\_\_  
Last Name First Name

Although we are anticipating a healthy summer, there may be times during the camp season when your child may not feel well. In the event that you are not readily available, we are asking for your permission, in advance to administer either of the following medications for the reasons specified. As is our practice, you will be notified if your child requires any medical attention.

Please check the box next to the medication and place your signature where indicated. The medications will be given in accordance with Willow Lake Day Camp's standing orders approved by our medical doctor.

Tylenol: To be given from camp stocks liquid, chewable, junior, and adult forms. This will be given for a temperature greater than 100.5 F or for a headache.

Permission granted

Benadryl: (dosage as per recommendation on package) To be given when camper exhibits an allergic response, i.e. insect bites, foods, environmental triggers. The child will be observed closely until symptoms subside.

Permission granted

The Willow Lake Health Office is staffed by a certified RN who is a school nurse during the school year. Nina has a great deal of experience caring for children and interacting with parents. Our Willow Lake parents have divergent views when it comes to how much communication they want with the health office. Please check one of following statements so we will know how best to communicate with you in a way which makes you most comfortable.

- I want to be called if, in the camp nurse's opinion, there is something she needs to communicate with me regarding the health and welfare of my child.
- I want to be called if my child is in the nurse's office for any reason whatsoever, even for a band aid.
